As a Nail machine supplier and Nail machine manufacturer, we have iron nail machine, it is easy to operate, 20 minutes to change and adjust the cutters, gripping dies and feeding unit while changing nail shank diameter and length. The main features of Nail production machine are it has a simple structure, good rigidity, easy to use, low maintenance cost. As wire nail machine manufacturers, we also have Automatic nail machine, machine spindle and straight shaft are connected with a timing belt, which is of easy maintenance. The adjustment is convenient and simple, meanwhile, the maintenance cost is low. The cutters and gripping dies are applied to the cam lever principle, swing around a fixed axis, simple and reliable, stable on precision control. Gripping dies are of double-punch structure, ensure a big ratio between diameter of the nail shank and nail head can be got. And nail manufacturing machine has the following features: Consistent nail shank length, good for making coil nails and paper/plastic strip nails. 24 hours keep working without stop. Safe and less noise. Durable and cheaper tools, lower using cost. Decrease your production cost.
